

# PREVENTIVE MAINTENANCE PROGRAMS

*Preventive maintenance is planned and reasonably priced.  
Emergencies are unplanned, inconvenient and expensive.*

We all take pride in our lawns and landscaping. A sprinkler system is a considerable investment and in order for it to give you just rewards, it has to be maintained much like your car, your house or anything else with moving parts. By purchasing a preventive maintenance program with SSI, besides the peace of mind you will receive considerable savings as opposed to purchasing the services individually. Save up to \$175 annually. Now add in the savings on water use and peace of mind that all heads on your system are adjusted and working properly and watering the correct amount for the time of the year.

Because of numerous requests for a more extensive plan with more scheduled visits through the watering season to adjust times on the controller to maximize water savings, we have introduced more choices.

Systems operating with city water are required to have the backflow preventer certified each year.\*

Choose the program and coverage you desire from the plans listed below.

**Service Call: \$75.00**

\*Certify backflow \$30.00

This is a single visit for specific service  
(without maintenance program)
